SUMMARY

Full-stack developer and digital designer with 7+ years shipping web products, event platforms, internal tools, and AI-powered applications across South Africa, the UK, and the Gulf. Skilled across the modern stack — Next.js, TypeScript, React, Supabase — and building production AI agents with the Claude API. Strong design background covering brand identity, event websites, and interactive experiences. Bridges high-quality frontend engineering, robust product design, and automated workflows.

01

EXPERIENCE

In-House Full-Stack Developer, Designer & AI Lead

APR 2023 – PRESENT

Fruition Consulting — San Diego, CA (Remote)

- Architected and deployed an AI-powered RFP agent (Next.js, TypeScript, Supabase, Inngest, Claude API) automating end-to-end RFP responses with an enforced human-review workflow.
- Engineered all AI layers as closed-world architectures (retrieve and reformulate) to strictly prevent LLM hallucinations.
- Designed and built high-performance event websites and registration portals across WordPress, Framer, and custom HTML/CSS/JS with Bootstrap and Tailwind.
- Shipped digital event experiences for major US associations including NOMA, NCBMP, NAIC, Purpose Built Communities, VANTA, and X-It Path.
- Developed mobile event companion apps for live on-site navigation, dynamic schedules, and digital resource distribution.
- Built an internal event check-in web app streamlining attendee arrivals at corporate conferences.
- Architected a secure internal IT Support Portal (Next.js, Azure AD, Google Sheets, Apps Script), cutting IT response times an estimated 60%.
- Designed, engineered, and maintained the official Fruition Consulting web presence.

Event Technology, Design & Operations Manager

JUN 2020 – JUL 2022

FittGROUP — Dubai, UAE

- Built and managed registration infrastructure on Swoogo and Cvent for a racing calendar of 15+ large-scale events — 25,000+ active participants combined.
- Designed high-converting event websites driving an estimated 35% year-over-year increase in online registrations.
- Lead graphic designer for a Red Bull-sponsored race: official race-route maps, start/finish lines, and track signage.
- Managed day-of operations — volunteer coordination, route safety planning, on-ground technical operations.

Founder — Yellowmoon City
Independent

JAN 2019 – MAR 2023

- Designed and deployed responsive WordPress, Shopify, and Framer web applications for 20+ small businesses and personal brands.
- Developed complete brand identity systems for companies including YakLife, HUB, 263HUB, Outsource Zimbabwe, and Maven Construction.
- Guided clients from wireframing and UI prototyping through production deployment and ongoing SEO.

Web Developer & Digital Marketing Specialist

JUN 2018 – JAN 2020

DJR Coaching Football Academy — London, UK

- Shipped a complete website rebuild and digital brand identity — 50% increase in trial-session signups within 6 months.
- Produced multimedia brand assets and video highlights; implemented SEO and analytics to monitor conversion.
- Ran multi-channel social and email campaigns growing the user base 3× over 18 months.

IT Systems Administrator

JAN 2018 – FEB 2019

AdvisingCommunities—London, UK

- Maintained corporate IT systems, networks, and identity systems across multiple offices; authored technical documentation and security guidelines.
- Reduced helpdesk resolution times an estimated 40% through triage automation and optimized workflows.

02

PROJECTS

BroilerOS

Production farm-operations platform — batch tracking, flock metrics, cost monitoring. `Next.js` · `TypeScript` · `React` · `Supabase` · `Vercel`

Lanyard

Event registration platform with a closed-world, context-contained AI assistant layer. `Next.js` · `TypeScript` · `Supabase` · `Claude API`

Relate

AI-native, security-focused CRM generating verified, cited background briefings. `Next.js` · `PGVector` · `Claude API` · `Supabase`

Runsheet

Lightweight, high-reliability event production and real-time operations dashboard. `React` · `TypeScript` · `Tailwind CSS`

Gridbase

Natural-language database engine that compiles conversational speech into structural schemas. `Next.js` · `LLM Agent Infrastructure`

03

CORE SKILLS

Engineering / Build

Next.js, TypeScript, React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, GSAP, Git, Vercel

AI & Automation

Claude API, LLM agent development, closed- world vector architectures, Inngest, Google Apps Script

Backend & Cloud

Supabase, PGVector, Microsoft Azure AD, IT systems administration, SQL, REST APIs

Platforms / CMS

WordPress, Shopify, Framer, Swoogo, Cvent

Design & UI/UX

Figma, Photoshop, Illustrator, After Effects, Premiere Pro, Canva, UI/UX prototyping, brand identity design

04

EDUCATION

MSc in Cyber Security — University of Gloucestershire, UK

BA in Business Management — University of Gloucestershire, UK

Diploma in Business, Tourism & Hospitality Management — University of Gloucestershire, UK
